The decibel (dB) is a ratio which may be used as a unit for expressing sound pressure level and sound power level. When used, the reference level must be specified.

## 4. TERMINATION OF USE OF NON-SI ALTERNATIVE UNITS

### 4.1 Termination of Use of Non-SI Alternative Units

**4.1.1** The non-SI units listed in Table 3-3 have been retained temporarily for use as alternative units because of their wide-spread use and to avoid potential safety problems which could result from lack of international coordination concerning the termination of their use. The use in Sierra Leonean civil aviation operations of the alternative non-SI units listed in Table 3-3 shall be terminated on the dates listed in the table below.

**Table 4-1 Termination dates for non-SI alternative units**
